Humans, It is I, HypnoCat, here to purrrsuade you to recycle your old electricals.

If you can't repair or donate them, always recycle them. Your old kettle, headphones, electric toothbrush and anything with a plug, battery or cable can be recycled - including the plugs, batteries and cables themselves.

It's as easy as 123

- 1 Bag up your unwanted or broken electricals
- 2 Delete data and remove batteries where possible
- 3 Use @recycleyourelectricals Locator to find your local repair, donation or recycling drop off points:
<https://bit.ly/4aloefM>

Repeat after me, I wiiiill recycle old electricals. Purrrfect.

Most of us have a drawer of doom filled with tangled cables and broken and unwanted electricals. The average UK home has **30 unused or broken items** gathering dust. Electricals contain valuable materials like gold, copper and lithium that should never be wasted.

Anything with a plug, battery or cable can be recycled and turned into something new - including the batteries and cables themselves. By recycling our old electricals, we help tackle e-waste - the fastest-growing source of waste in the UK, and globally.

The good news is that reusing and recycling them is easier than you think. Simply bag them up and use [Recycle Your Electricals](#) locator to find your nearest repair, donation and recycling points.
